

Handwritten notes: *Handwritten notes, ending pp p mp mf f ff*

Handwritten notes: *suppressed danger zone*

Handwritten notes: *Final Cadenza! Call strings have fun! don't collapse*

Handwritten notes: *Triple triple and transition into back to tempo! - might be worth it to just riff the ending, chug*

Handwritten notes: *ending idea*

Handwritten notes: *Compose a melody to end the piece, superimpose harmonies on the chugging strings*

Handwritten notes: *Were walking with a Walk of Sands in the triple section, which makes the ending appropriate*

Handwritten notes: *Alternatively, Violin Cadenza + voice for some major high point, the rest is functionally just a coda!*

Handwritten notes: *Opener "later section"*

String Study

A handwritten musical score for string study, consisting of five systems of staves. The notation is written in ink on a piece of paper with horizontal lines. The first system includes a treble clef and a key signature of one sharp (F#). The notation features various musical symbols, including notes, rests, and dynamic markings. Above the first staff, there are handwritten annotations: "1. measure 84" and "will read". The score is written in a cursive, handwritten style. The paper shows signs of age and wear, with some discoloration and a vertical crease down the center.

very carefully contrast

Terence O'Brien - Mozart as popular ambience, ambience that can suddenly unfold into full color

can use to transition
these loops w/ more tones

Create a string of tones, a system, that allows me to find gaps w/ strings of harmonies

Start 3

01=3 00=5 or 1 cont...
10=4 11=6 or 2 1

Ugh! This isn't working! Heard a series of mid. dis. quarter, expect to dance to find the right ending. It has to come from the heart, or the Thunder will Break.

Revised!

Winter Song, or Prelude to the Book of the Law Chorus

Handwritten musical notation for the Chorus section, consisting of six staves. The notation includes various notes, rests, and some markings above the staves, such as '7 7 7 7' and '2 2 2'.

Cadence

Handwritten musical notation for the Cadence section. It begins with a wavy line. Below it, there are four staves numbered 1, 2, 4, and 3. To the right of these staves, there is a section labeled "Cycling Chord Sequence" with a large bracket. Below this bracket, there is a section labeled "Melody shifts every 100 notes etc." with a large bracket. The notation includes various notes, rests, and some markings.

Handwritten text on the bottom page, providing instructions and commentary on the musical score. The text is written in a cursive, handwritten style and includes the following paragraphs:

1. Selecting an over all group of notes, the each cell will use a unique subdivision, length, and "Corruption Point". These will be chosen in an artistic, discretionary fashion.

2. All performers will be shared by all performers, an expression of vision if such existed in this context.

3. Corrupted tones, as designated by the "corruption point", are distorted/compressed sounds achieved by some form of extended technique, chosen by the player.

4. Flows may change the chosen technique between "corruption", but only between cells so as to maintain consistency.

5. The idea is to include variety in performance, giving players an opportunity to express their individual mastery of instrument and tone.

Maybe not these

Use March to put two kinds of sounds,
I come up with harmonic material
that bridges the gap

Melody idea completely altered for generative sound

-1. see iPad

String Quartet pg 2

* Dynamics also connected to Lh finger mass, empty compressed sand, f

The musical score is written on ten staves. The first four staves are for the first violin, second violin, first viola, and second viola. The fifth staff is for the first cello and second cello. The sixth staff is for the first double bass and second double bass. The seventh staff is for the first piano and second piano. The eighth staff is for the first harp and second harp. The ninth and tenth staves are empty. The score includes various musical notations such as notes, rests, and dynamic markings. There are also some handwritten annotations and a large 'X' mark on the first staff.

Handwritten annotations include:

- f* (forte) at the beginning of the first staff.
- Stroke Swells* written below the fifth staff.
- A large 'X' mark on the first staff.
- A box containing the number '4' on the first staff.
- A box containing the number '3' on the second staff.
- A box containing the number '2' on the third staff.
- A box containing the number '1' on the fourth staff.

Handwritten musical notation for Violin 1 and Violin 2, featuring wavy lines and notes.

to be an *affair* - Feb - 5/12/24

2 Sax, piano, viola, vello

first line

The above is great, but horrible. The melody looks only a semblance of substance, and is certainly not an *idea*.
an *idea* will include a simple pentatonic melody. This melody must be "rational", and carry with it an *impassioned* quality, allowing
for near-infinite variation. I will employ *dreaming*, *meditation*, or *altered states* to reach the *psyche space* containing
the musical material required. It is my hope that a true commitment to the method will yield decent results from which I might glean a *piece*.

idea?

~~the~~ instruments can serve as *poly* accompaniment, *phasing* in and out. This might be an excellent way to introduce *form*.

ASolve!

Hologram technique

Need Majial 5 note chord;
ending will be the same
chord, articulated fully by all instruments

Crazy!! How do we find the
perfect chord?? This is the problem of
10 guys on the horizon, it feels impossible to make a
decision. The chord has too many ramifications for the
outcome of the piece. Now that I have the system,
I might be able to overcome the piece.

Justly tuned chords might be the answer
Perhaps not, perhaps the open C natural harmonics,
or the open Cx2 stretched harmonics

A drone could be added, giving harmonic
stability to the spectral modulation.
We could also use the timewave to interpolate
chords.

- It might be prudent to quantize tones in chromatic, or microtonal, divisions
 - Chromatic is audibly preferable, whereas microtonality is not
 - As such, chromaticism will not be used.
 - only microtonality
 - only mapping to diatonic collections
- this will help avoid arbitrary sounding decisions

Timewave values

Range 12-21-2002 to 12-21-2012

- 9-24-2004
- 10-31-2006
- 9-18-2007
- 10-24-2009
- 1-20-2011

2-25-2003
might be important

Could remove "Source tones"
Remove them as the final instrument

Reverses the tone 5:1 4:5 3:4 2:3 1:2
then, the final chord/ending will disappear after the
first switch, returning at the end by all other means

5 tones (same)
(- Source tone)

Performance will reveal an expanding away of
four tones

- Start with 1 tone for final chord, introducing 1 inst at time
- add 2nd tone, sequentially
- Remove first tone sequentially, add 3rd
- add 4th sequentially
- add 5th sequentially
- a) change one note at a time sequentially (more segments)
b) change all notes per instrument sequentially (fewer segments)
- Cont. till end
 - a) remove one note per instrument, sequentially (empty chord, recoded)
 - b) remove one instrument, sequentially
 - c) flash cut-off

Take the timewave as is, superimpose it onto a frequency graph
to create an auditory hologram of the timewave.
If the tones of the timewave appear as a standard collection of
tones, the system might get ditched, or perhaps salvaged. If it's "too polar",
we might just stick w/ the coincidence.

Sections will be numbered and lettered

- 1st 1.1.a, 1.2.a, 1.3.a, 1.4.a, 1.5.a
2nd 2.1.b, 2.2.b, 2.3.b, 2.4.b, 2.5.b
3rd 3.1.c, 3.2.c, 3.3.c, 3.4.c, 3.5.c
4th 4.1.d, 4.2.d, 4.3.d, 4.4.d, 4.5.d
5th 5.1.e, 5.2.e, 5.3.e, 5.4.e, 5.5.e

Carta No. 23

Time Crystals in Music

↳ Archetypal chord progressions of varying lengths, with the intention to mix them temporally in some fashion

↳ can be classified by the # of chords in the time crystal (TC)

↳ by # of notes in each chord, a single number or sequence of numbers

↳ by diatonic or chromatic

↳ by whether or not octave displacement is required (noted with octaves of notes)

↳ by whether notes are borrowed

↳ by whether or not sequential form is equal for all chords

↳ by which notes are given the most weight/light (sequential form, longest to shortest)

↳ By which the time crystal can be expressed in one or more entrances.

Telos

Piece of Music

Time Crystals may or may not relate to existing principals in theory, but remains a methodology of controlling undefined parameters in the context of MY or Michael Gordon's music. Perhaps a worthwhile method of analyzing Steve Reich's Phasing Music

Music of time - translate to Croatian MUZIKA VREMENA - to be an effluent

ensemble will receive independent metronomes

A Score will consist of vertical cells of pre-made material,

Progressing via pre-scheduled landmark cues. Score will appear very conventional, and consist of samples of material in equal amounts

- temporal arrangement/form and cues are independent
- Music can be constructed in the manner of a standard piece of music

* - opens the door for spectral organization, and the use of live-processed electronics

↓ chords ↓ notes ↓ borrow ↓ # of swells

TC-2 . 2 . B . 1

↓ ↓
[] = []

[a . C . B.] = no weighting [a - C - B] = weighted, longest shortest

if 1 chord, list the harmonic content in "sequential form"

Taken as a whole, TC analysis is a tool to navigate, and categorize, chaotic relationships with a particular concern for density and self similarity. While the content of musical material must be additional in the traditional way, the extra parameters will have consistent effects on the qualities of the chosen material.

Violin Solo Concerto - Part 2

• 90 BPM + 60 BPM CONTRAST

Handwritten musical score for Violin Solo Concerto - Part 2, measures 1 through 137. The score is written on five systems of staves. The first system is marked with a double bar line and a right-pointing arrow. The second system is marked with a double bar line and a right-pointing arrow. The third system is marked with a double bar line and a right-pointing arrow. The fourth system is marked with a double bar line and a right-pointing arrow. The fifth system is marked with a double bar line and a right-pointing arrow. The score includes various musical notations such as notes, rests, and accidentals. The time signature is 4/4. The tempo is marked as 90 BPM + 60 BPM CONTRAST. The score ends with a double bar line and a right-pointing arrow.

Handwritten musical score for Violin Solo Concerto - Part 2, measures 138 through 257. The score is written on five systems of staves. The first system is marked with a double bar line and a right-pointing arrow. The second system is marked with a double bar line and a right-pointing arrow. The third system is marked with a double bar line and a right-pointing arrow. The fourth system is marked with a double bar line and a right-pointing arrow. The fifth system is marked with a double bar line and a right-pointing arrow. The score includes various musical notations such as notes, rests, and accidentals. The time signature is 4/4. The tempo is marked as 90 BPM + 60 BPM CONTRAST. The score ends with a double bar line and a right-pointing arrow.

New chord sequencing tool!!

* sequential tones can be fixed or free active, depending on application
* Next tool

4. -- -- E G
5. -- -- D

1. C Eb G Bb 7. C Eb A F
2. F Ab D F 8. F Ab E C
3. C Eb A C 9. C Db G G
4. F Eb E G 10. F Eb D D
5. C Ab G D 11. C Ab A Bb
6. F Db D Bb 12. F Db E F

Time Variable

frequency is a pitch in time. This means each note, any tone with a frequency, is actually a tempo. All prior work in polytemporal music could be effectively shuttled into a tonal system as abstraction.

Polytempo can become boring or predictable, so if the tones used could carry temp, harmonic change would = textural change. This could become difficult, but inherently more programmable.

take the tone ↓ several octaves
95 = 783.99 → -3oct = 783.99 / 8 = 97.99 Hz

783.99 bpm = 97.99 Hz bpm

ex 2. 1. ex 1, but use the spectral content of the venue itself.

- the generative melody derived from the harmonic series of the tones derived from the modal characteristics of the venue
- the timing of the piece could be derived from the final convergence point.

the harmonic complexity would increase the necessary time to "resolve" the piece. As such, a pre-determined length of time can be used to extract usable tones, initially the process

Additionally, the spectral content of the venue itself may determine the length of the piece as a whole. This combination may act as a creative fissure concerning the work as a whole

these parameters may be further manipulated by controlling the length
|| 1 2 3 4 5 6 7 8 ||
allowing for greater control of the musical features

1. Select a handful of tones
2. Interpolate octave displaced tones
3. Analyze Harmonic series of selected tones
4. Compose piece using the harmonic overtones of the chosen notes.

harmonic series might = D → D → D → D → D → D → D → D
giving the option of changing beat divisions of extrapolated tones.

Terence Opera could use similar techniques.

Opening Material will begin with a t2 zone - esque violin duo monologue; Similar to NMT 2, a single melody should be constructed out of hocketed melodic material. The focus of such material should be chords which fit nicely within a justly-tuned framework.

goals of opening: get audience attuned to the limited tonal space of the violas, then introduce the tutti sound.

perhaps passages like

, cycling but every so often all "dreams and prayers of the blind"

↳ the smaller rhythmic value will always land on the off-beats
↳ even if sonically it sounds on-beat.

these sections will have an arbitrary start-stop pulse, substituting a 16th for a longer beat value, giving the section breath pauses.

After introduction of orchestra, all included tones of the melody will be used for a canon reiteration, and offset to generate harmonic material.

Chordal Shocks

Notes that collapse in Swells can be used to step into new material

tutti can echo current musical material

definitely only for the solo opening material.

Such patterns lose clarity w/ orchestra

Highlighted zones act as sum total of harmonic material available to the violas

Two Ideas -
To people, 2 parts for

-Icarus 2- "to dance the space"
light spring, serene

-Icarus #3- "Innovation"
light spring R < F

-Icarus #4- "the beauty of
orch"

Handwritten musical notation on manuscript paper. The notation includes staves with notes, rests, and dynamic markings. The first section is labeled "Icarus 2" and the second section is labeled "Icarus #3". The notation is written in ink and includes various musical symbols such as clefs, notes, rests, and dynamic markings like *f* and *ff*. The notation is spread across the top of the page, with the first section occupying the left half and the second section occupying the right half. The notation is written in a clear, legible style, with notes and rests clearly defined. The dynamic markings are also clearly visible, providing information about the volume and intensity of the music. The notation is a mix of treble and bass clefs, and the notes are written in a standard musical notation style. The rests are also clearly marked, indicating the duration of the silence between notes. The overall impression is of a well-organized and professional musical score, with clear notation and easy-to-read instructions.
